    participant Database

    User->>System: Login
    System->>Admin: Generate new password
    System->>Database: Send email
    Admin->>System: Change password
    Database->>Admin: Record action
```

The diagram illustrates the process of a user logging in and receiving a password reset. It is divided into four swimlanes: User, System, Admin, and Database. The process starts with the User logging in, followed by the System generating a new password and sending an email. The Admin then changes the password, and the Database records the action.

Swimlanes:

- User
- System
- Admin
- Database

Process Flow:

- User logs in.
- System generates a new password and sends an email.
- Admin changes the password.
- Database records the action.

Regular Popup

Reset Password

A new system-generated password will be created and sent to the user's registered email address.

User Name	Role
Olivia Martin	Reseller

What happens next:

1. The system will generate a new temporary password automatically.
2. The user will receive an email with their new password and login instructions.
3. The user will be asked to change this temporary password after logging in.
4. This action will be recorded in the audit trail for security and compliance.

CancelSend Password

Error Popup

Unable to Reset Password

We couldn't generate a temporary password for this user at the moment. Please verify the user details and try again.

What happens next:

1. Verify the user's email address and account status.

2. Try the password reset action again after a few moments.

3. If the issue continues, contact the system administrator or support team.

4. This failed attempt will be recorded in the audit trail for security purposes.
